

## Project Brief

Project briefs help you to organize your ideas, think through the project, before spending time and money on your experiment. The questions generated from the brief will help narrow and define the project. This is just to get you started. The brief will be used to generate a more formal detailed proposal.

**Name/Date**

**Title or Topic**

**Objective:** What is the purpose of the research? What are you trying to find out?

**Justification** or Relevance of the Research

**Description:** How will the research be conducted? Special materials or resources needed?

**Limitations:** Every project has limitations. Is it time, geography, types of specimens, etc.
